

MOMS ACROSS AMERICA MOVEMENT

Championing policy and public servants that put children health, safety, and America's future FIRST.

DATA CENTERS

Approximately 47% of Americans currently live near an existing or planned data center. Thousands across the country are reporting devastating impacts to their communities from the water and power usage, land grabs, and noise. We ask for our elected officials to require data centers to follow the EPA impact assessment regulations and pause construction until completed.

Bills we support:

- ★ [Federal Data Center Enhancement Act of 2023](#) (Sen. Jacky Rosen, Sen. John Cornyn, Sen. Gary Peters) EXPIRING 9/30 WITH NO EXTENSION OR REPLACEMENT
- ★ [S.4214/H.R.9442 Artificial Intelligence Data Center Moratorium Act](#) (Sen. Bernie Sanders, Rep. Alexandria Ocasio-Cortez)
- ★ [H. Res. 1471](#) Data Center Bill of Rights (Rep. Ro Khanna)
- ★ S.3852 Guaranteeing Rate Insulation from Data Centers (GRID) Act (Sen. Josh Hawley, Sen. Richard Blumenthal)
- ★ [S.4213 Data Center Water and Energy Transparency Act of 2026](#) (Sen. Dick Durbin)
- ★ [S.4727/H.R.9183 Artificial Intelligence Environmental Impacts Act of 2026](#) (Sen. Ed Markey, Rep. Don Beyer)
- ★ [H.R.8488 AI Data Center Site Selection Transparency Act of 2026](#) (Rep. LaMonica McIver, Rep. Valerie Foushee, Rep. Andre Carson)
- ★ [Ban Artificial Superintelligence Act](#) (Sen. Bernie Sanders, Rep. Greg Casar)

Data centers are harming our communities by:

- Eminent domain home and land grabs violate Americans' right to live
- Draining the water from our wells, requiring many to leave their homes
- Contaminating our water supply with bacteria, PFAS, and other industrial chemicals
- Drawing power from the energy grids, causing blackouts and doubling energy costs
- Emitting noise and vibrations up to 95 decibels (10-20 is a nuisance)
- Reports of infertility in livestock where a data center has been built
- Coal ash pollution is used in fertilizer, contributing to high levels of heavy metals in food

Solutions:

- ➔ Support the bills that establish clear and enforceable standards covering both federal and private data centers, including public water and energy use disclosure, independent cumulative impact reviews, pollution and noise protections, ratepayer safeguards, decommissioning guarantees, and community consent of sites.
- ➔ Prevent taxpayer subsidies and expedited approvals from projects that have not met these standards.

Ask: Please extend the FDCEA of 2023 beyond September 30 and pause new federal approvals and financial support for data centers until comprehensive protections are enacted.
