

MOMS ACROSS AMERICA MOVEMENT

Championing policy and public servants that put children health, safety, and America's future FIRST.

PESTICIDES

We mothers, who purchase 85% of the food and comprise the majority of the 9 million swing voters of the last election, call on our elected officials to make decisions based on the health and safety of our children and the future of America.

House Bills

- ★ Reps. Thomas Massie and Chellie Pingree — **No Immunity for Glyphosate Act** ([H.R.7601](#))
- ★ Rep. Mace's **Pesticide Harm Accountability** ([H.R. 10144](#))
- ★ Rep. Mace's **SOUND Pesticide Research Act** ([H.R. 10145](#))
- ★ Rep. Pingree's **Paraquat Ban** ([H.R. 9357](#))

- ★ Reps. Luna, DeLauro, Massie and Pingree — **Americans vs. Poisonous Pesticides Act**, ([HR 9807](#))

Senate Bills

- ★ Sen. Cory Booker — **Pesticide Injury Accountability Act of 2025** ([S.2324](#))

Problems we face:

- 75% of Americans have a chronic illness
- 9.7 million struggle with fertility - 1 in 5 couples
- 54 million adults, 1 in 5 have mental health issues
- 27-52% of our teen boys and girls experience persistent sadness and hopelessness

Fact: Pesticides are a major contributing factor to our physical, mental and reproductive crisis.

- We have over 1,100 pesticide chemicals that make up over 50,000 pesticide products
- 86 of these pesticides are banned in up to 70 other countries
- 78% of these 86 have shown to cause reproductive damage- the other 22% no data
- No long-term testing with blood analysis is ever required on the final formulation of pesticides
- 3rd and 4th generation studies are not reviewed by the EPA
- 80% of glyphosate exposure could be eliminated by discontinuing GBH as a drying agent

We can reverse our chronic illness, mental illness and fertility crisis by reducing exposure to pesticides. We are counting on our elected officials to keep pesticide immunity shields OUT of legislation and hold pesticide manufacturers accountable for safety.
